

Instructions For Creating Your Own Webpage In GitHub

- 1) Visit github.com and click on “Sign Up” at the top right of the page.
- 2) Enter your email, create a password, and create a username. Then choose whether you want notifications and updates, and solve the puzzle to verify you are not an alien. Then select continue.

Welcome to GitHub!
Let's begin the adventure

Enter your email
✓ skevin902@gmail.com

Create a password
→ [password field] [Continue]

Enter a username
✓ demokevinaccount

Would you like to receive product updates and announcements via email?
Type "y" for yes or "n" for no
✓ n

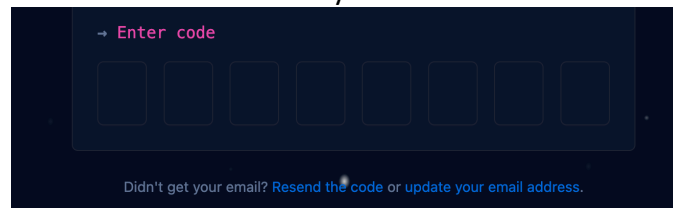

Verify your account

Please solve this puzzle to verify that you are human
Click "Start puzzle" to continue

[Start puzzle]

[Refresh] [Back]

- 3) You'll be sent a verification code which you will need to enter here.

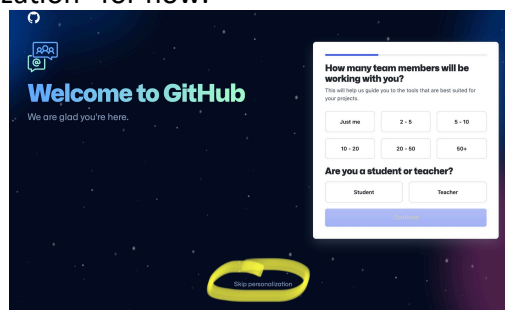

→ Enter code

[] [] [] [] [] [] [] []

Didn't get your email? [Resend the code](#) or [update your email address](#).

- 4) Select “Skip Personalization” for now.

Welcome to GitHub
We are glad you're here.

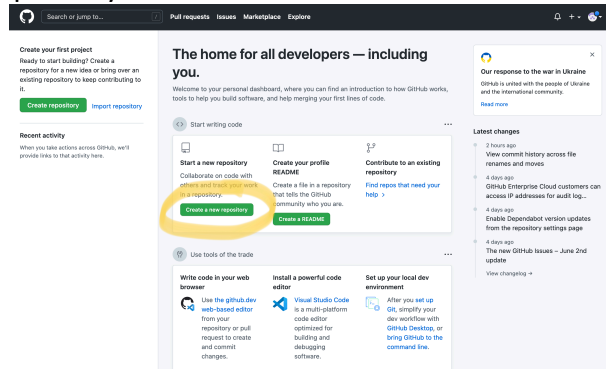

How many team members will be working with you?
This will help us guide you to the tools that are best suited for your projects.

Just me 2 - 5 5 - 10
10 - 25 25 - 50 50+

Are you a student or teacher?
Student Teacher

[Skip personalization](#)

5) Select “Create New Repository”

6) Choose a repository name. This is where all your files will be stored. Choose any name followed by “.github.io” so that you will be able to access this from any computer or device. When you’ve completed this, select “Create Repository” and that’s it!

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner ^{*} demokevinaccount

Repository name ^{*} demokevinaccount.github.io ✓

Great repository names are short, lowercase, and contain only alphanumeric characters and hyphens. demokevinaccount.github.io is available. [Learn more about repository names.](#)

Description (optional)

☒ Public
Anyone on the internet can see this repository. You choose who can commit.

☐ Private
You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☐ Add a README file
This is where you can write a long description for your project. [Learn more.](#)

Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

.gitignore template: None

Choose a license

A license tells others what they can and can't do with your code. [Learn more.](#)

License: None

☒ You are creating a public repository in your personal account.
